

## **Kansas Department of Corrections Utilizes JPay to Contain Costs and Drive Efficiencies**

The Kansas Department of Corrections (KDOC) is deploying JPay's kiosk platform to cut costs, decrease contraband, and expand its Intel capabilities. Inmates use JPay kiosks to download electronic media, send and receive electronic messages, and conduct video visitations. The Kiosk platform lowers costs by consolidating inmate property, reducing physical mail volume, and decreasing physical visits.

### **Electronic Media**

The inmate Mp3 player and corresponding kiosk music store consolidates inmate personal property making accounting of personal property easier.

### **E-Messaging**

Significant reduction of physical mail will reduce operational costs and limit the amount of contraband entering the facility. Kiosks also support submitting grievances electronically.

### **Video Visitations**

Video visits conducted from home reduces the visitation traffic at facility, decreases the influx of contraband, and limits inmate movement.

### **Trust Account Payments and Viewer**

Inmates can view their trust account balances and payments on the kiosk. This eliminates in person requests.

### **Intel Platform**

All services are integrated on a single platform allowing for greater Intel gathering and analysis on transactions.

### **About the Presenter**

#### **David R. McKune**

**Warden, Lansing Correctional Facility**

David R. McKune, a 35-year veteran of the Kansas Department of Corrections, was appointed to serve as warden of the Lansing Correctional Facility in September 1991. He is currently responsible for 2500 inmates and 702 staff members at the facility. Prior to becoming warden Mr. McKune served as Deputy Secretary of Correction from 1989-1991, Deputy Director from 1986-1989, Administrative Officer from 1985 - 1986, Deputy Director from 1981-1984, Classification Administrator from 1977-1981, and Correctional Counselor from 1975-1977.

Mr. McKune can be reached at (913) 727-3235 Ext. 7210
